

Multi-Unit Abutment System – TiLobe®

KEY BENEFITS

- Straight and angled (17° & 30°) abutments allow for consistent prosthetics
- Pre-mounted positioning tool for angled abutments makes seating simple
- Designed to accommodate fully and partially edentulous arches
- Torque recommendation: 30 Ncm
- Requires a Quad Driver for all abutments and screws. Recommended torque for prosthetic screws is 20 Ncm

Prosthetic versatility for the multiple unit screw-retained restoration

Internal TiLobe

Implant diameter Ø3.5 / Ø3.8 mm:

PLATFORM	DESCRIPTION	CUFF	REFERENCE
3.05 mm	straight	1 mm	70313-1
3.05 mm	straight	2 mm	70313-2
3.05 mm	straight	3 mm	70313-3
3.05 mm	angled 17°	3 mm	KM-70410C

Implant diameter Ø4.1 / Ø4.5 mm:

PLATFORM	DESCRIPTION	CUFF	REFERENCE
3.61 mm	straight	1 mm	70312-1
3.61 mm	straight	2 mm	70312-2
3.61 mm	straight	3 mm	70312-3
3.61 mm	straight	4 mm	70312-4
3.61 mm	angled 17°	3 mm	KM-70272C
3.61 mm	angled 30°	4 mm	KM-70273C

Implant diameter Ø5.0 / Ø5.5 / Ø6.5 mm:

PLATFORM	DESCRIPTION	CUFF	REFERENCE
4.34 mm	straight	1 mm	70411-1
4.34 mm	straight	2 mm	70411-2
